WELCOME TO WOODRISE 2019!

FPInnovations is pleased to announce the 2nd edition of the WOODRISE world congress on mid- and high-rise wood construction to be held in Québec City, Canada, September 30 to October 3, 2019.

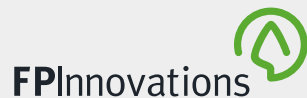

WOODRISE 2019 is geared towards all players in the construction industry and its main purpose is to bring together decision-makers and professionals involved in construction.

We aim to position North America as a leading technology showcase for wood predominant construction material within the context of sustainable, environmentally responsible urban development and to stimulate the synergy between international participants.

Co-organizers

FPInnovations (Canada)

FPInnovations is a not-for-profit world leader that specializes in the creation of scientific solutions in support of the Canadian forest sector's global competitiveness and responds to the priority needs of its industry members and government partners. It is ideally positioned to perform research, innovate, and deliver state-of-the-art solutions for every area of the sector's value chain, from forest operations to consumer and industrial products.

Institut Technologique FCBA (France)

Technological resource for the forest, wood, construction and furniture sectors, with a mission to promote innovation and technical progress and to contribute to the improvement of industry's productivity and quality by encouraging an integrated approach and implementation of synergies within the sector.

WOODRISE 2019 AT A GLANCE

Plenary Highlights:

- Update on International Public Policies - Leaders & Emerging Countries
- Major Worldwide Projects Realisation
- Bio-Economy & Carbon Market
- Quality of Life & End-Users, Comfort
- Science and Technology – Urban Densification - Wood as a Tool

Technical Workshop Themes:

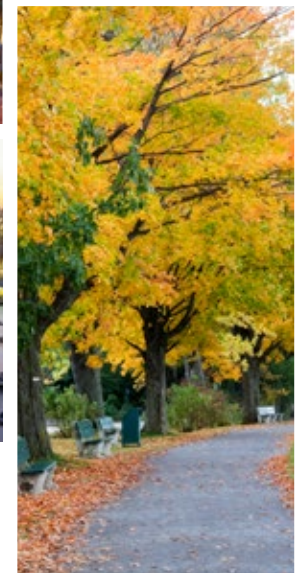

- Acoustic Performances & Vibration
- Structure & Seismic
- Fire Protection & Security
- Forest Resources & Wood Product Sustainability
- Asian Market: Research & Market Development
- Durable Building Enclosure Design

WOODRISE 2019 IN QUÉBEC CITY

For its second edition, the WOODRISE 2019 Congress will be held in beautiful Québec City, a highly popular destination, rich in history and tourist attractions.

The greater Québec City area has long demonstrated its leadership in the wood construction sector in North America. On top of its many historical wood buildings dating from 400 years ago, it is home to the first contemporary all-wood 6-storey building in North America, the Origine building with its 13 storeys, and various residential, institutional and commercial buildings. The forest sector is a major reason why Québec City has long been part of the development of wood in the construction industry.

A destination focused on pleasure, bustling with activities and culture, exciting and safe—Québec City seduces its visitors with its European aspect, its historic and cultural heritage, the proximity of nature, its rich gastronomy, and its warm hospitality. With the Congress being held in the fall, the participants will enjoy the cool weather and stunning colours typical of the province of Quebec. The coloured leaves make for a fantastic landscape!
